

REMARKS

Claims 1-12 are pending in the application.

DRAWINGS

Applicant has attached revised drawings that include previously missing or incorrect call out numbers. On the replacement sheet that includes Figure 5, Applicant has added call out number 80 to identify the magnetic flux as described in paragraph [0037] of the Application as originally filed. On the replacement sheet that includes Figure 7, Applicant has added call out number 54 to identify the conductor as described in paragraph [0040] of the Application as originally filed. On the replacement sheet that includes Figure 14, Applicant has replaced call out number 170 with call out number 155 to correctly identify the projection with a lower permability than the magnetic core as described in paragraph [0045] of the Application as originally filed. On the replacement sheet that includes Figure 17, Applicant has replaced call out number 184 with call out number 84' to correctly identify the eddy current reducing material as described in paragraph [0048] of the Application as originally filed.

SPECIFICATION

Applicant has amended paragraph [0045] to replace call out number 170 with call out number 155, which reflects the change to Figure 14. Additionally, Applicant has amended paragraph [0049] to remove call out number 182, which was included in the Application as originally filed in error.

CONCLUSION

Prompt and favorable consideration of this amendment is respectfully requested.

If the Examiner believes that personal communication will expedite prosecution of this application, the Examiner is invited to telephone the undersigned at (248) 641-1600.

Respectfully submitted,

Dated: 4/28/04
